

Welcome to the Nordic Research Conference on **Healthcare Architecture** at Chalmers, Göteborg, January 20 – 21, 2010

In January 2009, the first Scandinavian Research Conference on Healthcare Architecture was held at Chalmers University of Technology in Göteborg. 23 researchers gathered to tell about planned and ongoing activities, share experiences and discuss cooperation opportunities. The meeting was highly appreciated and helped to make the research field visible and build networks. It was hoped that this would be the beginning of an active exchange between the Nordic researchers within the field.

Therefore we invite to a follow up conference next year and thereby hope to contribute to the consolidation of the exchange of knowledge between the Nordic researchers within Healthcare Architecture. Also, the research area itself needs to be further discussed and defined. The format is “show-tell-discuss” – where the participants are invited to present and discuss their research.

At Chalmers we are in the process of establishing a Research Center for Healthcare Architecture. Your input in a discussion about how this center can contribute to jointly develop research about Healthcare Architecture would be most appreciated. You are very welcome to Chalmers and Göteborg, January 20-21, 2010!

Program:

Wednesday January 20th

12.00 Opening Lunch
13:00 - 17 00 Presentations
19.00 Dinner

Thursday, January 21st

08.00 Presentations
10.00 Reflections, Discussions
12:00 Closing Lunch

Welcome!

Peter Fröst, Adjunct Professor Space for Care, Chalmers Architecture
Marie Strid, PhD, Research secretary, Space for Care, Chalmers Architecture
